To whom it may concern:

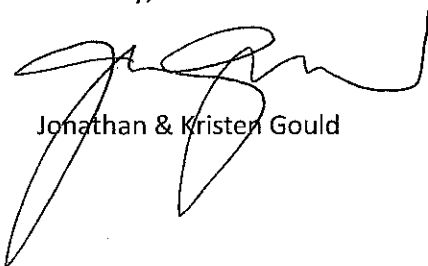

We are providing this letter as a character reference for Ken Hildebrandt Jr. Ken served as the general contractor on the construction of our summer house on Lot #2, Kalamalka Park Estates, in Coldstream B.C. Ken worked very closely with my wife and I on the construction of this house, and as a result we were able to witness firsthand the quality of his work throughout the project.

The architectural design of the house and the challenging location of the build made this a difficult project, however, Ken managed to successfully complete the build using a combination of creative solutions and attention to detail. We are very pleased with the end product.

Although the final product was spectacular, which in and of itself speaks volumes on his work, it was the collaboration during and customer service after the build that was equally impressive. Ken identified good local trades, worked well with our architects to ensure things were built to plan, and he kept the project on schedule. He was able to negotiate fair rates for all of the trades, and his detail and paperwork on the trade billings was very complete. Lastly, his customer service has been strong. He has always been available to quickly address any questions or issues related to the house, which we greatly appreciate.

Based on our experience on this build, we would highly recommend Ken for this type of construction project in the future. Should you require any further information regarding this recommendation, please do not hesitate to contact us.

Sincerely,

Jonathan & Kristen Gould
